## Commentary:

An arc of rain ahead of a low pressure area had swept in from the west overnight and the rain was just clearing Bisley by the time shooting began at 13.30. It remained overcast but dry for the rest of the afternoon.

At times the wind needed 6 minutes left, blowing the scope stand over twice. The direction was constant but the strength varied abruptly causing a number of stray shots into the magpie zone at 3.00 and 9.00, impacting heavily on individual scores. At one point we had to wait while the supporting frame on our target was changed. This caused some confusion for Roger Cluff regarding his scores when, following the restart, two markers appeared together on his target (one turned out to be his previous score from the time of the breakdown). There was debate as to which scores of our should be entered into club records but after adding up the totals there was general agreement that all scores should be included.

Well done Owen for the highest score and Martin for the highest total.

We definitely need more wind coach training!!
